Therefore, our admission seeks highly motivated candidates who possess a basic knowledge of business and will be able to achieve academic goals. It evaluates the candidates based on their ability of being successful in the global setting. All classes are conducted in English, therefore, the candidate's ability of communicating, writing, reading and understanding in English is particularly important and the students are required those skills in graduate study level. Comprehensive English language ability will be accessed in the admissions exam and interviews (recommended level of English is as follows: TOEFL-iBT: 85 or above, TOEFL-ITP: 570 or above, TOEIC: 780 or above, or IELTS: 6.0 or above).

The objective of the Management program is to provide students the career knowledge and skills to develop insights necessary for confronting the managerial challenges of increasingly global and technologically innovative industries. Through case analyses, simulations and interactive discussions we explore how practicing managers face critical decisions in generating new opportunities, and building organizational capabilities required for sustaining competitive advantage.

The Marketing program aims to provide sound theoretical bases and practical skills to students who wish to develop expertise in marketing area. In this program, students are expected to learn a range of decisions in planning (plan), execution (do), and control (see) of marketing strategies. Our curricula reflect fundamental issues of marketing strategies such as understanding of market environment (customers, competitors and collaborators), segmentation, targeting, positioning, the 4Ps (product, place, promotion and pricing) and brand management in the increasingly competitive environment.

The overall objective of the Finance program is to provide students with a solid understanding of finance and accounting allowing the application of various finance models to real world decision-making in a global context. We discuss how financial managers face critical decisions such as which assets the firm should invest in, how to raise the cash to pay for them, and how much cash they pay out as dividends to shareholders. In the classroom, we use case studies mixed with lecture style teaching.

The objective of the Family Business Management program is to train students who plan to succeed their family businesses. Through lectures and interactive case discussions, students learn how they should address typical challenges associated with management of family businesses for continuous growth and prosperity. The program is designed to provide interdisciplinary learning opportunities across management, marketing, as well as finance.
