

【Mission, Objectives, Educational Research Objectives, Our Ideal Student】

1. Mission

The mission of the Institute of Business and Accounting's Graduate Department of Advanced Management Doctoral Program is to focus on understanding advanced business issues and to promote both theoretical research and research with practical applications. To this end, we emphasize partnerships with corporations and government organizations and seek to improve standards for theoretical research in addition to establishing a foundation that enables highly verifiable research. This results in quality research outcomes that combine practical issues with the theoretical ones.

2. Objectives

The Institute of Business and Accounting's Graduate Department of Advanced Management Doctoral Program proactively strives for research with high applicability, focusing on relationships with society. Our central area of research is management. We deal with a broad array of issues related to management, including that of corporations and government organizations such as local governments. Our focus is on logically explaining various findings from the real world and increasing the applicability of the findings.

3. Educational Research Objectives

Developing Advanced Specialists to Resolve Advanced Business Issues

We strive to develop people that can contribute to society through advanced theoretical research and practical applied research outcomes into advanced business issues, focusing on relationships with society and based on management studies.

4. Our Ideal Student

We develop researchers and specialists who work on advanced research by using both scholarly and practical methodologies based on advanced specialized knowledge of management.

- 1) Individuals who will become corporate managers, executives, and high-level managers in government organizations such as local governments
- 2) Researchers in both public and private research institutions
- 3) Experts with advanced consulting capabilities
- 4) Faculty members and practitioners affiliated with education and research in professional graduate schools
